

THY VEILS

The vast expanse of everything. In the embrace of Romania's mystical landscapes, Thy Veils stands as an emblem of artistic transcendence - an ensemble that intricately fuses the philosophical with the aesthetic. Architects of experience, crafting portals to the ineffable, Thy Veils is an art collective weaving a multidimensional tapestry of storytelling. Keep your heart in wonder!

It is a concept turned into style, a minimalist and complex meditation. Born out of the reality of the past millennium, nurtured by digital media expression and communication, Thy Veils' art speaks through dense vision about exploration, experimentation and the search within the sphere of the undefined, of movement in the quantum.

Thy Veils started as a studio project in 1995, headed by Daniel Dorobantu, and soon it became a pioneering name in the Romanian ambient music scene. After 13 years of studio productions, in 2008, Daniel transformed Thy Veils into an ensemble of performing arts.

To date, Thy Veils has self-produced nine studio albums with their latest 'Next ForEver' in 2024, three live recordings and numerous singles, a DVD with non-narrative video essays, video art for live performances and video installations, music for film and contemporary dance.

Thy Veils' live events are immersive audio-visual shows, transporting the auditorium towards the worlds within and the unfathomable depths of empathic comprehension and contemplation.

"To have these vibrant pieces delivered straight to your inbox, we warmly invite you to join our community on Patreon at no cost. Your subscription allows us privileged moments of connection as we share these creations intimately and incrementally." (Daniel Dorobantu)

As a sideline, Daniel Dorobantu has his own Bandcamp store with eighteen varied studio releases with guest musicians and female vocalists, including several live appearances at festivals & church settings in Romania.

Petre Ionuțescu – flute, trumpet

Vlad Sturdza – guitar

Octavian Scurtu – rhythm, sound design

Alexandru Hegyesi – dulcimer

Ana Telea – guitar

Radu Pieloiu – drums, percussion

Ciprian Costache – guitar

Lumine. The album is a complex composition that spurned my interest from the first chime chord. It is, in my opinion, an introspection inside a honeycomb of acoustic dreams. It has a chronology all of its own and a cyclic tone that kept me plugged into the incandescent. The atmosphere it emanates is electric, playful, joyful and full of emotion Valentin Vizuroiu

Neoradiant is the next step in Thy Veils' odyssey, a new and vast dimension, defined by an artistic vision that focuses on the future and getting there, guided by a sense of wonder, enthusiastic dynamics, and the contemplative ecstasies of freely exploring the Universe and its reality.

Recorded live on the Galactic Tick Day at the Galactic Tick Festival, 9 September 2023 Timisoara

Spanning the whole galaxy, moving at 828,000 km/h around the supermassive black hole at its centre, Galactic Tick Day celebrates our progress around the Milky Way. It is the first holiday designed to raise awareness about the fascinating movement of the Solar System around our galaxy.

The time needed for our solar system to move around the galactic centre is roughly 225 million years. Galactic Tick Day occurs on a regular interval of 1.7361 years, called a Galactic Tick, and it represents 1/129,600,000 (one centi-arcsecond) of our solar system's orbit around that black hole at the centre of the Milky Way.

Most people have a good sense of the motion of our solar system because it is a fundamental part of our lives. The rotation of the Earth makes for day and night; our planet's revolution around the sun marks a year. But fewer Earthlings grasp the larger picture, that our solar system is just one among billion others, orbiting a supermassive black hole at the centre of the galaxy. And where the sun goes, we go too.

The first Galactic Tick Day took place one galactic tick after Hans Lippershey filed the patent for the telescope on 2 October 1608. The first observance of the holiday was on 29 September 2016, the 235th Galactic Tick Day.

This is also the day Thy Veils joined the celebration.

Against An Oblivion Of The Forgotten Past

Second release from the band in 1999, dark ambient. It was a concept turned into a style, a minimalist and complex meditation. Born out of the reality of the past millennium, nurtured by digital media expression and communication, Thy Veils' art speaks through dense vision at that time about exploration, experimentation and the search within the sphere of the undefined, of movement in the quantum.

THE DIAPHANOUS DEPRESSIONS

The Diaphanous Depressions

The 4th Thy Veils album, entitled “The Diaphanous Depressions”, was recorded in 2000 and for the first time in Thy Veils’ music there are spoken words, performed by Ciprian Costache and Daniel Dorobantu.

In 2001 Video Hammer Productions (USA) used Thy Veils’ music as soundtrack in “The American Ghost Society’s 2001 National Conference” video production. Nonnut Muzik released Thy Veils’ 4th album, “The Diaphanous Depressions” CD.

Thy Veils debut released in 1998 and remastered 2006.

The opening track Portal goes dark into a forbidding and chaotic scene of eerie sounds, that follows a sombre mood, with symphonic neo-classical overtones.

On October 18, 2015 Daniel Dorobantu and his guest special - Cristian "Sol Faur" Smith (guitar, DORDEDUH) - have performed for 8 hours without stopping in front of over 500 people, gathered in the Roman Catholic Church Elisabetin Timisoara .

The album "Silence of contents" was recorded during a concert of the same name, which marked 20 years of singing.

Sound engineer Attila Lukinich (studio DSPro) has moved multidimensional experience then painstakingly captured in concert, in a work studio designed to carry the listener to experience the same enchanting fairytale. The silence of contents is a unique musical production, each individual sound being treated separately in order to obtain a complete phrases starting right at this level of detail.

Fluid from end to end, the new album by Daniel Dorobantu offers an hour of music immersive and enveloping, emotional and also detached. A timeless journey between worlds safely, which always leads to deep. Immersed in music, the listener experiences a state of inner silence, of not disturbing, joy, which changes the perception of flow time.

Daniel Dorobantu surprise is the main tool of research of the mysteries of the universe. This album artist probed uncharted netherworld and brings up stories circulating sound as the world between people, by the people, above and below..

THY VEILS

(Cântările Din Lin)

Thy Veils' allegory premiered at the Ceau Cinema Film Festival and is now part of the Songs Of Tranquillity streaming event (Cântările Din Lin), Timeshards, showcases Thy Veils' new artistic direction, 3 days of audio-visual transmission from Bihar (1849 m) in the Apuseni Mountains

The event was an experimental one. It is a first step in a series of actions that seek a fresh event in which to merge three elements: the natural landscape, public access and online.

This was not a public event, just a stage amplification system, lighting, and an improvisation streamed online on July 31st 2016.

**Debut track from Alira Mun
produced by Thy Veils founder
member Daniel Dorobantu.**

Recently, they released a new song, called Arise, a journey in the future, sending out to metropolitan atmospheres and containing elements of global perspective.

Daniel Dorobanțu and Petre Ionuțescu, the musicians who for years formed an electronic jazz duo, with ambient and modern-class influences, released a new song, called Arise, accompanied by a video. This is the continuation of the album, which the two presented last year, The Stone Book, with the support of Jazz Banat Cultural Foundation.

If the album The Stone Book "watched" through its pieces, archetypal and mythological, as its creators say, the new song, Arise, offers a journey in the future, sending out to metropolitan atmospheres and containing elements of global perspective.

The two musicians say the new song is totally different from their previous productions, being more rhythmic, more dynamic. "With this piece we present a new direction of our productions," says Daniel Dorobanțu.

Gnosis

Gnosis is the common Greek noun for knowledge (γνῶσις, gnōsis, f.). ... It is best known from Gnosticism, where it signifies a knowledge or insight into humanity's real nature as divine, leading to the deliverance of the divine spark within humanity from the constraints of earthly existence.
